

Exciting opportunity for an accomplished, entrepreneurial, and highly motivated **Sustainability Consultant** to join an established a rapidly growing team to drive positive outcomes for our clients and the continued growth of our business across EMEA.

## About You

You have a passion for sustainability and governance and both experience and ability to apply this to reasonable business objectives. You are a motivated self-starter who is comfortable in a highly collaborative, virtual working environment. You are able to manage multiple projects and your time efficiently and effectively. You are comfortable and experienced working with business development to help drive new business opportunities. You want to work collaboratively in an organization with a strong culture, committed to all employees. You are driven by results. You want to take the opportunity to make a difference, for yourself, for us and for our clients.

## PRIMARY RESPONSIBILITIES:

- Build relationships with future clients and maintain those
- Work a territory effectively to maximize marketing and sales efforts
- Directly lead client engagements to provide suitable and relevant strategic advice on sustainability structure, strategy, and disclosures.
- Work with business development consultants to drive the business, reporting directly to and partnering with the Managing Director on both business opportunity and client driven initiatives

## REQUIREMENTS:

- A minimum of 5-8 years in corporate sustainability.
- Knowledge, understanding and practical experience of the major sustainability reporting standards and frameworks such as SASB, TCFD, GRI, UN SDGs, and other relevant industry standards.
- Understanding of current related legislation with a finger on pulse of future developments.
- Understanding of ESG ratings agencies and data aggregators.
- Understanding of the internal corporate structure and multi-functional approach to sustainability.
- Strong organizational and project management skills.
- Evolved relationship management skills and comfortable in senior management and board environments.
- An understanding and appreciation for the value of data to balance discussion of strategy and purpose.
- Understanding of investor and other stakeholder perceptions and expectations of companies' corporate governance and sustainability initiatives, performance, disclosures and the impact on reputation and decision making.
- Experience in driving thought leadership and broader research initiatives (examples a plus).
- Understanding and appreciation of the corporate business case for sustainability.

Rivel Research Group is the premiere data-driven management consulting firm focused solely on helping clients mitigate risk, improve valuation and drive performance.

Our rapidly growing client list includes some of the largest publicly traded companies in the world in a wide variety of industries.

Rivel Governance and Sustainability (G&S) helps companies understand and communicate their corporate governance and sustainability value proposition. Our sustainability/ESG consulting services help guide corporate ESG disclosure and provide structure and strategy for companies to successfully navigate the evolving sustainability landscape for the long term.
